REASONS FOR ALLOWANCE

1. This Office Action is responsive to the Amendment filed on 12/6/05.
2. Claims 25-28 are allowed.
3. The following is an examiner's statement of reasons for allowance:

References 2002/0150147 and 6,891,857 are additionally cited because they are pertinent to the claimed invention.

-Regarding to independent claims 25 and 26, none of prior art of record teaches or suggests a method and an associated system for avoidance transmission interference, as claimed, wherein the method/system comprises a procedure/device of changing size of packets on one of two channels to allow transmission to proceed simultaneously on both of the channels where the frequency collision between transmission on the two channels was predicted, in combinations with other limitations recited in the claim. Mansfield (6,859,450), previously cited, teaches the claimed invention except that in Mansfield, the packet transmission on one of the two channels in a time slot, where the frequency collision occurred, is muted or discarded, and therefore, results in only the packet transmission on the other of the two channels is carried out on that time slot in order to avoid the frequency collision. It would not have been obvious for a person skilled in the art to implement Mansfield in view of other prior art of record for leading such the implementation to the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
